TECHNICAL SKILLS

Frontend Development

React.js JavaScript HTML5

CSS3 Tailwind CSS Vite

React Router

Backend Development

Node.js Express.js REST API

JWT Middleware

Authentication

Database

MySQL PostgreSQL SQL

Prisma ORM Database Design

Tools

Git GitHub Postman

VS Code Firebase

EDUCATION

Bachelor of Science in Software Engineering

Adama Science and Technology
University

Expected Graduation: 2028

LANGUAGES

English

Amharic

PROFESSIONAL SUMMARY

Software Engineer specializing in full-stack web application development with experience building modern, scalable, and user-focused software solutions.

Experienced in developing frontend applications using React.js and backend systems using Node.js and Express.js.

Skilled in designing REST APIs, implementing authentication systems, role-based access control, database architectures, and enterprise workflow applications.

Passionate about creating clean, maintainable software solutions using modern engineering practices and solving real-world business problems through technology.

PROFESSIONAL EXPERIENCE

Independent Software Engineer

2025 - Present

- Developed full-stack web applications using React.js, Node.js, Express.js, and SQL databases.
- Designed secure authentication systems using JWT, middleware, and role-based authorization.
- Created RESTful APIs and database architectures for scalable applications.
- Built responsive dashboards and management systems with reusable components.
- Applied software engineering principles including clean architecture and maintainable code practices.

FEATURED PROJECTS

NexusHub Office Operations Management Portal

[React.js](#) | [Node.js](#) | [Express.js](#) | [MySQL](#) | [JWT](#)

Enterprise office management platform designed to manage employees, departments, work requests, and company assets.

- Role-based authentication (Admin, Manager, Staff, Viewer)
- Work request workflow system
- Asset management and assignment tracking
- Department management
- Dashboard statistics and activity tracking

ASTU Clearance Management System

[React.js](#) | [Node.js](#) | [Express.js](#) | [MySQL](#)

University clearance management platform that digitizes student clearance workflows between students and departments.

- Multi-department approval workflow
- Student request tracking
- Department dashboards
- Clearance progress monitoring

Taxi Driver Location Platform

[React.js](#) | [Node.js](#) | [Socket.io](#) | [MySQL](#)

Real-time transportation platform connecting drivers and users through location services.

- Driver availability management
- Real-time location updates
